Work Experience

CRED | SDE — **Aug'25 - Present**

- Developed and optimized member-facing Flutter experiences across Credit Cards, Flights, Hotels, and Insurance verticals for an application with **50M+ downloads**.
- Delivered pixel-perfect Flutter UI with a strong focus on **animations**, smooth interactions, and performance optimization across multiple member flows.
- Built reusable back-merge workflows and **AI-assisted migration tooling** using **Claude** to streamline migration from a native add-to-app architecture to **Pure Flutter.**
- Built an **AI-powered Flutter PR review agent** that automatically analyzes pull requests for performance issues, memory leaks, anti-patterns, and Flutter best-practice violations.
- Worked across Flutter, Dart, Kotlin (Android), Swift (iOS), Firebase, and GitHub Actions on cross-platform features, native integrations, and developer tooling.

Mokutan | Flutter Developer — **Jul'24 - Jul'25**

- Built scalable Flutter applications using **Riverpod** and Firebase services including Authentication, Firestore, Hosting, Storage, Cloud Functions, Remote Config, App Check and App Distribution.

Slick | Flutter Developer (Founding Team) — **Dec'22 - Jun'24**

- Built a Flutter app from scratch as part of the founding team, growing to **1M+ downloads** with a focus on architecture, performance, and product analytics.
- Implemented **BLoC** architecture, **Crashlytics**-driven stability improvements, and **Amplitude** analytics to optimize engagement and user flows.

AS&Co | Flutter Developer (Freelance) — **Sep'21 - Dec'22**

- Built real-time Flutter applications with **Google Maps** integration, WebSockets, **Push Notifications** (Firebase Messaging), **Dynamic Links**, OpenAPI-generated API clients, and **GitHub Actions**-based flavor deployments.

Happy Us | Technical Head (Flutter) — **May'21 - Oct'21**

- Developed and launched a Flutter application from scratch using **GetX**, dynamic theming, and web-compatible navigation.

Sikarwar Softwares | Flutter Developer — **Oct'20 - Apr'21**

- Developed Flutter applications with **IoT integrations**, **WebSocket-based chat systems**, and Google Maps for real-time location updates.

Projects

google_maps_widget - Flutter Package (see other **packages on pub.dev here**) — **Apr'21**

- Published a **Flutter package** on **pub.dev** (**~2k downloads**) simplifying **Google Maps** integration, polyline generation, and real-time driver location tracking.

firebase_phone_auth_handler - Flutter Package (see other **packages on pub.dev here**) — **Apr'21**

- Published a **Flutter package** on **pub.dev** (**~95% popularity)** simplifying **Firebase** phone authentication with OTP verification, SMS auto-fetch, and web support.

Skills

Flutter | Dart | Firebase | BLoC | Riverpod | Clean Architecture | REST APIs | WebSockets | CI/CD | GitHub Actions | Kotlin | Swift | AI Tooling | Claude | AWS

Education

Bennett University | Uttar Pradesh, India — **2019 - 2023**

- *Computer Science Engineering, CGPA: **8.57***
